While 40 sportsmen from across the country blanketed the nation's capital last week to urge the Obama Administration and Congress to protect Bristol Bay, the EPA responded to the state of Alaska's request to halt its ongoing watershed assessment.

In a response to a letter from Alaska Attorney General Michael Geraghty, EPA Region 10 Administrator Dennis McLerran noted that the EPA's process was initiated at the request of Alaska Native tribes and numerous others, and that it has been transparent. He added that EPA had worked to address the state's concerns, was happy to meet with the state again and had not begun any regulatory actions. McLerran wrote: "The Watershed Assessment will provide important data that will help inform future decision-making with respect to Bristol Bay — whether it be use of our authority under Section 404(c) or another action— as we work with the State and others to ensure the sustainability of the fisheries."

A Salt Lake City letter writer expressed frustration with Utah Sen. Orrin Hatch, who called Pebble an Alaskan state issue. Stuart McDonald writes, "In other words, 'states' rights," by Hatch's unspoken but real definition, means the rights of mostly multi-national businesses to corrupt any state government and its officials so they can do whatever they want in that state purely for their profit and not for the benefit of the people of the state, let alone the country."

Lastly, teens from Alaska Youth for Environmental Action presented Legislator of the Year Awards to three representatives, Sen. Gary Stevens, Sen. Bill Wielechowski, and Sen. Hollis French for their work on protecting Bristol Bay, combating genetically modified fish and other issues.

*Standard-Examiner*

I got a letter from Senator Hatch in response to my request that he oppose Rio Tinto's proposed open-pit Pebble Mine in Alaska (like the environmentally disastrous Kennecott Copper Mine also owned by Rio Tinto in the Oquirrh Mountains just west of Salt Lake City). He said that there is nothing he can do about the Pebble Mine because it is in Alaska... [Click here to read more](#)
